PROJECTS

1. BrainHaven

BrainHaven is a MERN stack-powered platform enhanced with Tailwind CSS for design and Cloudinary for media management. It offers coding resources, roadmaps, hackathon tools, and a Hackmate feature, fostering collaboration and growth within the tech community.

2. Personal Portfolio Website

A personal portfolio website designed to showcase my skills, projects, and achievements. Built using HTML, CSS, and JavaScript, this website highlights my development work and serves as a professional introduction to my abilities.

3. Library Management

The Library Management System is a comprehensive project developed in the C programming language, designed to efficiently manage the operations of a library. This system simplifies common library functions and provides an intuitive interface for users.
