Animesh Prakash

FULL STACK DEVELOPER AND A PROGRAMMER

EDUCATION

Class 10

KV Shalimar Bagh
Completed Class 10 from Kendriya Vidyalaya, gaining a strong foundation in academic subjects and essential skills.

Diploma in Computer Science

Guru Nanak Dev Rohini Campus
The college emphasizes a hands-on approach to learning, preparing students for successful careers in technology.

SKILLS

1. Full Stack Development
- HTML
- CSS
- Node.js
- JavaScript
- React
- Express

2. MERN Stack Development
- MongoDB
- React
- Express
- Node.js

3. Programming
- C
- C++
- Data Structure and Algorithm

Projects

1. Web Development
- https://portfolioofanimesh.netlify.app
- https://netstream-ap16.netlify.app/
- https://taskynest.netlify.app
- https://passap.netlify.app (In working)

2. Programming
- Library Management

PROFILE

Full Stack Developer and Programmer skilled in front-end and back-end technologies, including JavaScript, React, Node.js, Express, and MongoDB. Experienced in developing scalable applications with a focus on optimized performance. Strong foundation in data structures and algorithms using C/C++. Passionate about solving complex problems, delivering efficient solutions, and constantly learning new technologies to enhance user experiences and improve development workflows

EXPERIENCE

Full Stack Development
Built and deployed full-stack applications utilizing various technologies such as HTML, CSS, JavaScript, and backend frameworks. Focused on server-side logic, database management, and user interface design, emphasizing best practices in code quality and application performance.

Data Structure and Algorithm(C & C++)
Strengthened problem-solving skills through C and C++ by implementing various data structures (like trees, graphs, and linked lists) and algorithms (including sorting and searching techniques). Participated in coding challenges to enhance algorithmic thinking and optimization techniques

MERN Stack Development
Developed responsive web applications using MongoDB, Express.js, React, and Node.js. Implemented RESTful APIs for efficient data handling and created engaging user interfaces with React, ensuring a seamless user experience.

Independent Projects
Worked independently on several projects, utilizing GitHub for version control and project management. Developed a deep understanding of best practices in software development, maintaining project documentation, and engaging in code reviews for personal projects.
